

TECH-M

TECH-M is a unique combination of the latest generation of measuring technology, web based software and our smart mechanical measuring tool. This gives you a fast, easy and accurate way to measure, compare and document any car body.

Software

- » Easiest way to see status of the car body
- » Gives your workshop an unique opportunity to create documentation of measurements
- » Do a comparative measuring or insert values from the car manufacturer for an accurate measurement
- » Electronic documentation gives flexible storage and traceability
- » No installation needed, just use a modern web browser

HIDE LINE

Body type

Choose between existing car body images or upload a custom image.

☒ Sedan

☐ Station wagon

☐ Custom image

Choose which side to measure

☒ Right side

☐ Left side

Place the measuring points, choose your tolerance and insert the measuring values.

Choose between multiple car body images or upload a custom image to measure.

Mechanical measuring tool

TECH-M is a perfect tool for diagnosis, repair and quality control.

A light weight measuring tool with an easy to read printed scale.

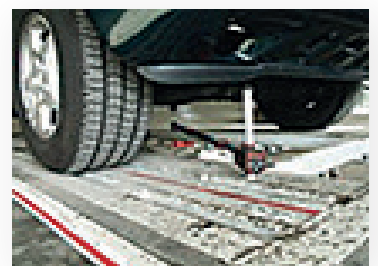

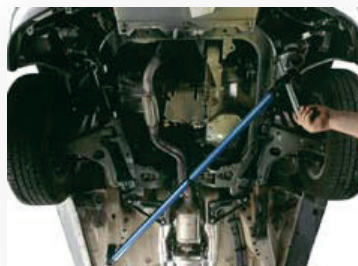

ADVANTAGES

- » Quick and easy measurement of point to point “P2P” dimensions (length, cross and symmetry of hights) of the vehicle.
- » Built-in spirit level allows you to compare measurement of height anomalies.
- » Unique patented magnetic mount allows the measuring to be carried out by only one person.

FLEXIBILITY

TECH-M works everywhere - on the lift, straightening bench and frame rack.

Art.no. TEC0100M

Includes complete mechanical measuring tool with adaptors and access to the web based software.

TECH is delivered with a metal tool panel.
